Complete any of these courses entirely from your home or office and at any time of the day or night.

Prices start as low as:

Creating Web Pages

Learn how to design, create, and post your very own site on the Internet's World Wide Web using HTML. Discover low-cost marketing techniques and search engine strategies.

Designing Effective Websites

This course will teach you powerful graphic design techniques that will help you build Web sites that are attractive and highly effective. You'll learn what attracts visitors to a site, and how you can create the most satisfying experience for those visitors. You'll learn to use typography, aesthetics, color, graphics, and page layout to create the most compelling user interface possible, and you'll understand how users read on the Web and the characteristics of effective Web writing.

Introduction to Dreamweaver CS3

Intermediate also available!

Learn Adobe Dreamweaver from a Web design pro. Master the techniques for producing fully functioning sites, learning how to insert and format text, images, hyperlinks, tables, and a variety of media formats. Discover the secrets of effective page layout—secrets that ensure your sites reach and impress your audience.

Introduction to PHP and MySQL

Learn how to create an interactive Web site, allowing visitors to post and retrieve information provided by you or your site's visitors. You'll see how to use the PHP programming language to generate dynamic Web sites that automatically change as your data changes. You'll also learn how to use the popular MySQL database server with PHP to store and retrieve data over the Web.

Introduction to CSS and XHTML Intermediate also available!

Learn how to create state-of-the-art Web sites using modern CSS and XHTML techniques. Take your existing HTML skills to the next level and start building sites like the pros.

Introduction to Microsoft FrontPage 2003

Learn the essentials of Microsoft's Web sitebuilding software. Start with an introduction to basic Web design principles, and explore the interface and features of FrontPage. Then, you'll learn how to manipulate words and images to create a site worthy of publishing to the Internet. By the end of the course, you'll be armed with all the knowledge you need to create an attractive, well-designed, and functional Web site.
